The screenshot shows the 'Styling' panel for a 'Listbox' widget. The panel has an orange header with a wrench icon and the word 'Styling'. Below the header, it says 'Show Styling Options For' followed by 'Listbox' and a refresh icon. The panel is divided into several sections, each with a dropdown arrow:

- Analytics Designer Properties**: Contains a 'Name' field with the value 'ListBox_1'.
- Size and Position**: A collapsed section.
- Widget**: A collapsed section.
- Actions**: A collapsed section.
- Listbox Style**: Expanded section showing three color pickers for 'Selected', 'Mouse Hover', and 'Mouse Down'.
- Font**: Expanded section showing 'Font' (Arial), 'Size' (14), 'Color' (black), and 'Style' (Bold, Italic, Underline buttons).

5.17.4 Events

The `onSelect` event is triggered when the end user makes a selection at runtime.

5.17.5 Script API

Besides the following script API shared among all widgets:

```
// Returns the layout of the widget
```
