

The screenshot shows the 'Builder' interface for the 'Value of Slider' widget. It features a blue header bar with a wrench icon and the word 'Builder'. Below the header, the section 'Value of Slider' is expanded. Under this section, there are four input fields: 'Data Source Type' (a dropdown menu showing 'Script Variables'), 'Min Value' (a text box with '0'), 'Maximum Value' (a text box with '100'), 'Start Value' (a dropdown menu showing 'Please select'), and 'End Value' (a dropdown menu showing 'Please select').

Figure 54: Bindings of Slider

Image

- Bindable values: Image URL
- Supported Bindings: Script Variable

The screenshot shows the 'Builder' interface for the 'Image Source' widget. It features a blue header bar with a wrench icon and the word 'Builder'. Below the header, the section 'Image Source' is expanded. Under this section, there are two radio buttons: 'None' and 'Dynamic Variable' (which is selected). Below the radio buttons, there is a text box labeled 'Binding the image source's URL with variable' containing the text 'Please select' and a dropdown arrow.

5.24.2 Enabling Write-Back at Runtime

A value that an end user selected or updated at runtime can be passed to a Script Variable, which may be referred to in scripts or by other widgets.
