

## 5.4 Action Menu

The action menu  is a dynamic menu and is only visible if the widget is selected. Different widgets have different options available, and some of the options aren't available in view mode.

## 5.5 Script Editor View

Scripting provides you a powerful way to define a widget's runtime behavior and how it can interact with other widgets and other available functionality.

To edit a script function,

- Click the  button in the *Action Menu*
- Or click the same button next to the widget name in the *Outline*.
