5.21.6 Deleting Bookmarks

You can delete a bookmark with the `deleteBookmark()` script API.

Example:

In the following example, the currently applied bookmark is deleted:

```
var bookmarkInfo = BookmarkSet_1.getAppliedBookmark();
BookmarkSet_1.deleteBookmark(bookmarkInfo);  // delete bookmark
```

5.22 Notification API

When an analytic application is running at the backend, for example, when scheduled for publishing, you can use a script API to send notifications to the application consumers in the *Notification* panel and via e-mails.

Notification Panel

Email template

Notifications include the following elements:

- Title
